Subashini Jesurasa, PsyD

Brookville Center
for Children's Services

Brookville Center
for Children's Services

HOME AND COMMUNITY BASED PROGRAM

offers therapeutic and educational services to children in their own home, nursery school, preschool or other natural environments.

Our mission is to provide comprehensive services to children with an emphasis on assisting families in understanding their child's strengths and areas of need.

Brookville Center
for Children's Services

HOME AND COMMUNITY BASED PROGRAM

- Services to Early Intervention, Preschool (CPSE) and School Age children in Nassau and Suffolk counties
- Home or community-based services in the areas of ABA, special education/SEIT, speech and language therapy, occupational therapy, physical therapy, counseling, parent training and sensory integration therapy.

HOME AND COMMUNITY BASED PROGRAM

The Home-Community Based Program offers therapeutic and educational services to children in their own home, nursery school, preschool or other natural environments.

Brookville Center has a great reputation in providing research based interventions that focus on maximizing the skills of children within the Autism spectrum and other disabilities in the home and community settings. All providers are New York State certified in their area of expertise and have various years working in the field of Applied Behavior Analysis (ABA) and special education.

EARLY INTERVENTION

Children between the ages of birth to three years old with a suspected developmental delay or a diagnosis that might result in a developmental delay may be evaluated to determine eligibility for services. Every evaluation assesses the motor, language, cognitive, adaptive and social emotional development of each child. Individualized goals are designed to meet the needs of each child and family.

Services, using a transdisciplinary approach, are then provided in the setting that best suits the needs of each child and family, whether home-based, center-based or at an outside day care or nursery school setting. Upon the referral from the Department of Health, BCCS is committed to assisting children 0-3 years in achieving their full potential within their natural environments.

The following services can be provided at home or in a day care or nursery school setting:

- Core and supplemental evaluations
- Neurological screenings
- Psychological evaluations and services
- Occupational therapy
- Physical therapy
- Speech and language therapy
- Special education
- Applied behavior analysis (ABA)
- Bilingual social work services
- Family training and support groups

PRESCHOOL (CPSE)

The focus of the Home-Community Based Preschool Special Education Program is to enhance child development and provide an education which will foster language, learning, creativity and socialization. Preschool children 3-5 years of age may receive Special Education Itinerant services, Applied Behavior Analysis (ABA) and/or Related Services (Speech, OT, PT or Parent Training) in their home day care or nursery school. Approval for the services and location must be determined by the child's local school district Committee on Preschool Special Education.

SCHOOL AGE

Upon referral from the school district in which the child resides, school age (5-21 years old) students can receive Educational Services, Behavioral Services (ABA) and/or Related Services (Speech, OT or PT) within their own home as well as alternative community based site. In home parent training is also available.

ENROLLMENT

Enrollment is determined by referral from the Department of Health for Early Intervention Services and from the local school district for preschool and school age children. Parents are responsible for arranging for and paying the costs of any child care.
