

Free iPad Apps from Inclusive Technology

This is a group of excellent iPad apps that each present a sequential story activity. Children touch the screen to move the story to the next picture.

The pictures are not narrated. It's an excellent opportunity for parent and student to tell (and re-tell) the story together. Great for receptive and expressive language.

These apps are free from Inclusive Technology from the Apple Store.

The easiest way to find them is to search for Inclusive Technology LTD and then locate the Apps. These will all say GET (meaning they are free).

Underground Subway

Cash Machine ATM

Switch Fan

HKL Photo Booth

Pedestrian Crossing

Self Service Checkout

Mobil Cell Phone

Television Time

Elevator Up

Sensory Room

Many of the children have used SwitchIt Stories software in class so they may be familiar with the format and characters.

Inclusive also has a free app called **Finger Paint with Sounds** which your children might enjoy. They can pick their colors and draw with no music or sound, with music or with sound effects. Fun and good for fine motor skills, color identification, pointing, etc.
